About Me

Professional focused on crop quality, yield improvement, and profitability by maximizing aspects involved in plant growth, such as water quality, pest management, climate, and environmental control, fertilizer regime. Previously worked as a Grower at the South Central Growers in Tennessee, growing, submitting trials and research on new varieties of ornamentals species for large companies such as Syngenta, Ball, Pan American and Dummen Orange mainly, with the annual improvement of plants.

PROFESSIONAL EXPERIENCES

SOUTH CENTRAL GROWERS- TN, USA

2022 - 2023

Responsible for growing and caring for a variety of annuals, perennials, flowers, and vegetable plants. Tasks include crop care, greenhouse management, pest control, and moisture control. Also involved in plant science activities such as improving crop recipes, conducting trials, and implementing Integrated Pest Management (IPM) techniques. Developed and executed large trials for major companies in the industry. Proficient in the application of chemicals and experienced in maintaining and analyzing environmental data in a high-tech greenhouse. Skilled in using office tools and applications.

Achievements include successful cost reduction through trials with new technologies, effective monitoring and interpretation of greenhouse parameters, and a good understanding of the market's needs and challenges.
